SUBJECT INDEX

P = Proceedings of the Anatomical Society of Great Britain and Ireland
(*dem*: Poster demonstration)
PA = Proceedings of the Anatomical Society of Australia and New Zealand
(*dem*: Poster demonstration)

Abductor pollicis longus, The function of the abductor pollicis longus muscle in relation to the basal joint of the thumb (Oudenaarde & Kauer) **173,** 227, *P*

Acetylcholinesterase, Distribution of acetylcholinesterase in the nerve endings of chicken *m. retractor phalli cranialis* (Ohsawa, *et al.*) **170,** 63

Achondrogenesis, Quantitative histology of cartilage vascular canals in the human rib: findings in normal neonates and children and in achondrogenesis II-hypochondrogenesis (Gruber, *et al.*) **173,** 69

Achondroplasia, Kinetic parameters in the growth plate of normal and achondroplastic (cn/cn) mice (Sannasgala & Johnson) **172,** 245

ACTH, Stereological and functional investigations on isolated adrenocortical cells. II. Zona glomerulosa cells of chronically ACTH-treated rats (Andreis, *et al.*) **168,** 199

Adrenal cortex, Stereological and functional investigations on isolated adrenocortical cells. II. Zona glomerulosa cells of chronically ACTH-treated rats (Andreis, *et al.*) **168,** 199

Adrenal gland, nerve supply, The innervation of the adrenal gland. IV. The source of pre- and postganglionic nerve fibres to the guinea-pig adrenal gland (Parker, *et al.*) **172,** 17

Adrenal medulla, The innervation of the adrenal gland. IV. Innervation of the rat adrenal medulla from birth to old age. A descriptive and quantitative morphometric and biochemical study of the innervation of chromaffin cells and adrenal medullary neurons in Wistar rats (Tomlinson & Coupland) **169,** 209

Fetal rat adrenal cells maintained in culture continue to express tyrosine hydroxylase (Earl & Bird) **170,** 227, *P*

Transplantation of the adrenal medulla into the caudate nucleus as a treatment for Parkinson's disease: a 1 year follow-up (Carmichael, *et al.*) **173,** 226, *P*

Ageing, The effects of age on cerebellar neuron number (Sturrock) **170,** 225, *P*

Morphometric analysis of the supraoptic nucleus in the human brain (Hofman, *et al.*) **172,** 259

Changes in intestinal cell proliferation, absorptive capacity and structure in young, adult and old rats (Goodlad & Wright) **173,** 109

A comparison of age-related changes in neuron number in the dorsal motor nucleus of the vagus and the nucleus ambiguus of the mouse (Sturrock) **173,** 169

Changes in uptake of serotonin into sympathetic perivascular nerves in old age (Violet & Cowen) **173,** 220, *P*

Skeletal muscle fibre number in the rat from youth to adulthood (Timson & Dudenhoeffer) **173,** 33

Amphibia, Langerhans-like cells in amphibian epidermis (Carrillo-Fargo, *et al.*) **172,** 39

Androgens, The effects of genetic sex and androgens on skeletal muscle tissue (Stickland & O'Shaughnessy) **170,** 234, *P*

Angiogenesis, Endothelial cell activation during angiogenesis in freely transplanted skeletal muscles in mice and its relationship to the onset of myogenesis (Roberts & McGeachie) **169,** 197

Microvascular morphology during tumour-induced angiogenesis (Williams, *et al.*) **170,** 259, *dem*

Ansa cervicalis, Fibre composition of the hypoglossal nerve in the rat (O'Reilly & Fitzgerald) **172,** 227

Anteversion, Femoral anteversion in healthy children. Application of a new method using ultrasound (Upadhyay, *et al.*) **169,** 49

Aperiodic microfibrils, Features of the aperiodic microfibrils associated with mouse dental basement membrane demonstrated by ultrastructural histochemistry (Ishizeki, *et al.*) **173,** 139

Apocrine secretion, The monoptychic glands of the jugulo-sternal scent gland field of *Tupaia*: a TEM and SEM study (Zeller & Richter) **172,** 25

Architectonics, Three dimensional neural architectonics (Bjaalie, *et al.*) **170,** 219, *P*

Area vasculosa, Growth of the chick area vasculosa *in ovo* and in shell-less culture (Stewart, *et al.*) **172,** 81

Articular disc, Histological studies on the triangular fibrocartilage complex of the wrist (Benjamin, *et al.*) **172,** 59

Astrocytes, Astrocytes remove waste material from within neurons (Nolan, *et al.*) **170,** 249, *dem*

Astrocytes, development, An ultrastructural study of the development of astrocytes in the midbrain of the lizard (Monzon-Mayor, *et al.*) **170,** 33

Atrial natriuretic peptide, Atrial granule structure and distribution following blood volume expansion in untreated and capsaicin-treated rats (Scott, *et al.*) **173,** 212, *dem*

Atrium, granules, Atrial granule structure and distribution following blood volume expansion

in untreated and capsaicin-treated rats (Scott, *et al.*) **173,** 212, *dem*

Auerbach's plexus, Prenatal undernutrition permanently decreases enteric neuron number and sympathetic innervation of Auerbach's plexus in the rat (Santer & Conboy) **168,** 57

Quantitative histochemical analysis of the adrenergic component of Auerbach's plexus in streptozotocin-treated diabetic rats (Baker) **173,** 239, *dem*

Axon regeneration, Axonal sprouting in the thalamus of adult rats following implantation of a peripheral nerve graft (Campbell, *et al.*) **170,** 229, *P*

Basal lamina, Histochemical localisation of alkaline phosphate in the thick basal laminae of kidney cells of the gerbil *Meriones crassus* (Safer & Abu-Salem) **173,** 201, *dem*

Possible origin of the membrane-bound bodies of the thick basal laminae of kidney cells of the gerbil *Meriones crassus* (Safer & Abu-Salem) **173,** 201, *dem*

Basement membrane, Features of the aperiodic microfibrils associated with mouse dental basement membrane demonstrated by ultrastructural histochemistry (Ishizeki, *et al.*) **173,** 139

The basement membrane as a structure and functional entity (Furthmayr) **173,** 197, *P*

Basophilic leukaemia cells, Cytoskeletal changes associated with secretion in rat basophilic leukaemia cells (Bennett & Clinton) **170,** 242, *P*

Bats, Fine structure of subendocardial (Purkinje) cells of the insect-eating bat (*Pipistrellus pipistrellus*) (Ayettey, *et al.*) **173,** 37

Binucleate cells, The role of trophoblastic binucleate cells in implantation in the goat: a morphological study (Wango, *et al.*) **171,** 241

Bladder, nerve supply, Histological and immunocytochemical studies on the postnatal development of autonomic neurons and paraganglia in the human urinary bladder neck (Gosling, *et al.*) **173,** 219, *P*

Blood vessels, nerve supply, Changes in uptake of serotonin into sympathetic perivascular nerves in old age (Violet & Cowen) **173,** 220, *P*

Bone, The structure of vascular channels in the subchondral plate (Clark) **171,** 105

Bone (Boyde) **173,** 197, *P*

Bone cells, Cell-substratum contacts of osteoclasts and osteoblasts: a correlative study of reflection and fluorescence images using confocal light microscopy (Jones, *et al.*) **170,** 255, *dem*

Cytoskeletal proteins in bone cells *in vivo* (Jones, *et al.*) **170,** 255, *dem*

Bone, remodelling, Periosteal response in translation-induced bone remodelling (Feik, *et al.*) **171,** 69

An *in vivo* assessment of muscular activity and the importance of electrical phenomena in bone remodelling (McDonald & Houston) **172,** 165

Bone shape, The effect of diet on bone shape in the mouse (Johnson, *et al.*) **172,** 213

Bone, stress, Periosteal response in translation-induced bone remodelling (Feik, *et al.*) **171,** 69

Brachial plexus, Anatomical study of the brachial plexus variations Al-Hubaity, *et al.*) **173,** 231, *P*

Brain, Comparative morphometry of the mammalian brain: estimates of cerebral volumes and cortical surface areas obtained from macroscopic slices (Mayhew, *et al.*) **172,** 191

Brain, blood supply, A quantitative study of cerebrovascular variation in inbred mice (Ward, *et al.*) **173,** 87

Brain, development, Morphometric study on the development of magnocellular neurons of the supraoptic nucleus utilising immunohistochemical methods (Lazcano, *et al.*) **168,** 1

Appearance of laminin, heparan sulphate proteoglycan and collagen Type IV during initial stages of vascularisation of the neuroepithelium of the mouse embryo (Herken, *et al.*) **169,** 189

Brain, ventricles, Response of intraventricular macrophages to crotoxin-coated microcarrier beads injected into the lateral ventricle of postnatal rats (Kaur, *et al.*) **168,** 63

Bronchioles, Surface morphology of the terminal bronchiolus of prenatal and adult cats (Al-Tikriti & Henry) **173,** 243, *dem*

Bronchus, nerve supply, Morphology of presumptive rapidly adapting receptors in the rat bronchus (Kappagoda, *et al.*) **168,** 265

Calcaneus, The mechanical properties of the human subcalcaneal fat pad in compression (Bennett & Ker) **171,** 131

Carcinoma, *In vitro* interactions between collagen type V, type I and 8701-BC breast carcinoma cells (Luparello, *et al.*) **173,** 200, *dem*

Cartilage, An immunohistochemical study of the distribution of matrical proteins in the mandibular condyle of neonatal mice. I. Collagens (Silberman & Von der Mark) **170,** 11

An immunohistochemical study of the distribution of matrical proteins in the mandibular condyle of neonatal mice. II. Non-collagenous proteins (Silberman, *et al.*) **170,** 23

Cartilage structure and function (Stockwell) **173,** 199, *P*

Cartilage, articular, The structure of vascular channels in the subchondral plate (Clark) **171,** 105

The organisation of collagen fibrils in the superficial zones of articular cartilage (Clark) **171,** 117

Cartilage canals, The development of centres of ossification of bones forming elbow joints in young swine (Visco, *et al.*) **171,** 25

Cartilage, classification, The cranial cartilages of teleosts and their classification (Benjamin) **169,** 153

Cartilage, elastic, The structure and ultrastructure of the rostral cartilage in the spiny eel, *Macrognathus siamensis* (Teleostei: Mastacembeloidei) (Benjamin & Sandhu) **169,** 37

Cartilage, epiphyseal, Kinetic parameters in the growth plate of normal and achondroplastic (cn/cn) mice (Sannasgala & Johnson) **172,** 245

Cartilage, hyaline, Quantitative histology of cartilage vascular canals in the human rib: findings in normal neonates and children and in achondrogenesis II-hypochondrogenesis (Gruber, *et al.*) **173,** 69

Cartilage, matrix, Morphological aspects of rat metaphyseal cartilage pericellular matrix (Quacci, *et al.*) **171,** 193

Cartilage, metaphyseal, Morphological aspects of rat metaphyseal cartilage pericellular matrix (Quacci, *et al.*) **171,** 193

Catecholamines, The innervation of the adrenal gland. IV. Innervation of the rat adrenal medulla from birth to old age. A descriptive and quantitative morphometric and biochemical study of the innervation of chromaffin cells and adrenal medullary neurons in Wistar rats (Tomlinson & Coupland) **169,** 209

Cell culture, Patterning cell adhesion and movement on artificial substrata; a simple method (Britland, *et al.*) **170,** 235, *P*

Cell damage, Creatine kinase and neuron-specific enolase in serum markers of cell damage in the human central nervous system (Lee, *et al.*) **173,** 224, *P*

Cell death, Simultaneous cell death in the trigeminal ganglion and in ganglion neurons present in the oculomotor nerve of the bovine fetus (Bortolami, *et al.*) **169,** 103

The arrangement of forearm motoneurons in young and adult rats and the possibility of naturally occurring motoneuron death (Scarisbrick, *et al.*) **171,** 57

Central nervous system, Creatine kinase and neuron-specific enolase in serum markers of cell damage in the human central nervous system (Lee, *et al.*) **173,** 224, *P*

Cerebellum, Fractionator studies on Purkinje cells in the human cerebellum: numbers in right and left halves of male and female brains (Mayhew, *et al.*) **169,** 63

Synapse-to-neuron ratios in rat cerebellar cortex following lengthy periods of undernutrition (Warren & Bedi) **170,** 173

Effects of undernutrition on neuronal connectivity in the cerebellar cortex of rats (Warren & Bedi) **170,** 225, *P*

The effects of age on cerebellar neuron number (Sturrock) **170,** 225, *P*

The possible role of the external granular layer in the process of cerebellar gyrification (Matta) **173,** 226, *P*

Predicting neuron number from cerebellar weight: studies on mammalian brains (Mayhew) **173,** 226, *P*

Cerebellum, cultured, Formation of synapses in cerebellar explants by axons from co-cultured media (Bird) **173,** 77

Cerebral cortex, Estimates of volumes and pyramidal cell numbers in the prelimbic subarea of the prefrontal cortex in experimental hypothyroid rats (Madeira, *et al.*) **171,** 41

Cerebrum, Comparative morphometry of the mammalian brain: estimates of cerebral volumes and cortical surface areas obtained from macroscopic slices (Mayhew, *et al.*) **172,** 191

Cervical rib, The ossification of the costal element of the seventh cervical vertebra with particular reference to cervical ribs (McNally, *et al.*) **170,** 125

Cetacea, The thalamic projection to the sensory neocortex of the porpoise, *Phocoena phocoena* (Revishchin & Garey) **169,** 85

Chick embryos, Growth of the chick area vasculosa *in ovo* and in shell-less culture (Stewart, *et al.*) **172,** 81

Chorionic villi, A confocal and conventional epi-fluorescence microscope study of the intermediate filaments in chorionic villi (Bradbury & Ockleford) **169,** 173

Choroid plexus, Prolactin receptors in the primate choroid plexus (Walsh, *et al.*) **168,** 137

Chromaffin cells, The innervation of the adrenal gland. IV. Innervation of the rat adrenal medulla from birth to old age. A descriptive and quantitative morphometric and biochemical study of the innervation of chromaffin cells and adrenal medullary neurons in Wistar rats (Tomlinson & Coupland) **169,** 209

The adrenal chromaffin cell as a model sympathetic neuron (Carmichael) **173,** 218, *P*

Circle of Willis, A quantitative study of cerebrovascular variation in inbred mice (Ward, *et al.*) **173,** 87

Circulus arteriosus, A quantitative study of cerebrovascular variation in inbred mice (Ward, *et al.*) **173,** 87

Cleft lip, Cell deposition and degeneration in relation to cleft lip formation (Vermeij-keers, *et al.*) **173,** 236, *P*

Clenbuterol, Comparison of the effects of clenbuterol on sheep pineal cells and rat soleus muscle: cAMP accumulation and β-receptor binding (Maltin & Howell) **173,** 209, *dem*

Clenbuterol overrides the lectin-induced atrophy of skeletal muscle in rats (Delday, *et al.*) **173,** 209, *dem*

Cochlea, Morphology of the rat cochlear primary afferents during prenatal development: a Cajal's reduced silver and rapid Golgi study (Angulo, *et al.*) **168,** 241

Cochlear nuclei, Morphology of the rat cochlear primary afferents during prenatal development: a Cajal's reduced silver and rapid Golgi study (Angulo, *et al.*) **168,** 241

Collagen, Proteoglycan:collagen interactions and subfibrillar structure in collagen fibrils. Implications in the development and ageing of connective tissues (Scott) **169,** 23

An immunohistochemical study of the distribution of matrical proteins in the mandibular condyle of neonatal mice. I. Collagens (Silberman & Von der Mark) **170,** 11

The organisation of collagen fibrils in the superficial zones of articular cartilage (Clark) **171,** 117

Subfibrillar architecture and functional properties of collagen: a comparative study in rat tendons (Raspanti, *et al.*) **172,** 157

Effect of loss of mechanical distension on collagen degradation in the mouse uterus (Shimizu & Hokano) **173,** 161

Collagens in corneal development (Linsenmayer) **173,** 198, *P*

Loss of type VI collagen during decidualisation in human and rodent endometrium (Aplin, *et al.*) **173,** 199, *dem*

In vitro interactions between collagen type V, type I and 8701-BC breast carcinoma cells (Luparello, *et al.*) **173,** 200, *dem*

Collagen-T antigen gene, Expression of the hybrid human α1(II) collagen-T antigen gene in transgenic mice (Tam, *et al.*) **173,** 203, *dem*

Connective tissue, Connective tissues: ground rules and ground substance (Scott) **173,** 198, *P*

Coprodaeum, A sampling scheme for studying the functional morphology of the coprodaeum in hens on high and low-NaCl diets (Mayhew, *et al.*) **170,** 246, *dem*

A sampling scheme intended for tandem measurements of sodium transport and microvillous surface area in the coprodaeal epithelium of hens on high- and low-salt diets (Mayhew, *et al.*) **173,** 19

Cornea, A comparative biochemical and ultrastructural study of proteoglycan–collagen interactions in corneal stroma (Scott & Bosworth) **170,** 243, *P*

Differential effect of oxygen tension and lactate concentration on keratan sulphate and hexuronate-containing glycosaminoglycan production in cornea (Balduini, *et al.*) **173,** 200, *dem*

Cornea, development, Collagens in corneal development (Linsenmayer) **173,** 198, *P*

Corpus callosum, Morphometry of the adult human corpus callosum: lack of sexual dimorphism (Going & Dixson) **171,** 163

Costal element, The ossification of the costal element of the seventh cervical vertebra with particular reference to cervical ribs (McNally, *et al.*) **170,** 125

Cranial cartilages, The cranial cartilages of teleosts and their classification (Benjamin) **169,** 153

Craniofacial development, The emergence of cell population heterogeneity during early craniofacial development (Thorogood) **173,** 237, *P*

Cyclopia, Floor of the median orbit in human cyclopia: an anatomical study in three dimensions (McGrath & Sperber) **169,** 125

Deep inguinal ring, The surface marking of the deep inguinal ring (Halpin, *et al.*) **173,** 246, *dem*

Dendrites, Obtaining three-dimensional models of dendrite structures (Simmons & Johnson) **170,** 218, *P*

Methods of assessing dendritic spine density (Horner & Arbuthnott) **173,** 223, *P*

Dendritic spines, Methods of assessing dendritic spine density (Horner & Arbuthnott) **173,** 223, *P*

Density gradient fractionation, Morphometric analysis of nerve endings isolated from bovine and rat neurohypophysis (Toescu & Morris) **173,** 1

Dentine, unmineralised, Ultrastructural visualisation of proteoglycans in early unmineralised dentine of rat tooth germs stained with cuprolinic blue (Tenorio, *et al.*) **169,** 257

Diabetes, A morphometric study on placental diffusing capacity for oxygen in maternal diabetes (Jackson, *et al.*) **170,** 248, *dem*

Quantitative histochemical analysis of the adrenergic component of Auerbach's plexus in streptozotocin-treated diabetic rats (Baker) **173,** 239, *dem*

Diabetic neuropathy, Junctional complexes in the perineurium of the sural nerve in human diabetic neuropathy; a study by freeze-fracture electron microscopy (Beamish, *et al.*) **170,** 232, *P*

Diaphragm, Systematic distribution of muscle fibre types in the rat and rabbit diaphragm: a morphometric and ultrastructural analysis (Kilarski & Sjöstrom) **168,** 13

The distribution of lymphatic stomata in the diaphragm of the golden hamster (Fukuo, *et al.*) **169,** 13

Diet, The effect of diet on bone shape in the mouse (Johnson, *et al.*) **172,** 213

Dobsonia praedatrix, The megachiropteran pineal organ: a comparative morphological and volumetric investigation with special emphasis on the remarkably large pineal of *Dobsonia praedatrix* (Bhatnagar, *et al.*) **168,** 143

Dorsal motor nucleus, A comparison of age-related changes in neuron number in the dorsal motor nucleus of the vagus and the nucleus ambiguus of the mouse (Sturrock) **173,** 169

Dorsal root ganglia, Glutamate-like immunoreactivity in dorsal root ganglia neurons of the rat (Kai-Kai & Howe) **170,** 258, *dem*

Ductus deferens, Ultrastructure of the monkey vas deferens (Leong & Singh) **171,** 85

Innervation of the monkey vas deferens (Leong & Singh) **171,** 93

Duodenum, An immunohistochemical study of endocrine cells in the proximal duodenum of eight marsupial species (Takagi, *et al.*) **168,** 49

Dysraphism, Variation in the response of chick embryos to incision of the roof plate of the neural tube at different developmental stages (Clarke & Scothorne) **168,** 167

Eccrine secretion, The monoptychic glands of the jugulo-sternal scent gland field of *Tupaia*: a TEM and SEM study (Zeller & Richter) **172,** 25

Ectoderm, healing, Specialized embryonic ectoderm does not re-form after wounding (Wilson & McNeill) **173,** 207, *dem*

Electrical effects, An *in vivo* assessment of muscular activity and the importance of electrical phenomena in bone remodelling (McDonald & Houston) **172,** 165

Embryo culture, The effect of macromolecular rat serum fractions on conceptuses cultured in human serum: role of transferrin (Gulamhusein, *et al.*) **168,** 113

Enamel, The incidence and histology of the brochs of human enamel (Jayasinghe) **170,** 244, *P*

Endometrium, Exogenous gonadotropins – serum oestrogen and progesterone and the effect on endometrial morphology in the rat (Kramer, *et al.*) **173,** 177

Loss of type VI collagen during decidualisation in human and rodent endometrium (Aplin, *et al.*) **173,** 199, *dem*

Endothelium, The ultrastructural architecture of interendothelial junctions of rat cardiac microvasculature as demonstrated by ruthenium red and lanthanum nitrate (Sarraf, *et al.*) **170,** 258, *dem*

The involvement of peptidergic vascular innervation in endothelium-dependent relaxation to acetylcholine (Scott & Drodge) **173,** 208, *dem*

Enteroendocrine cells, An immunohistochemical study of endocrine cells in the proximal duodenum of eight marsupial species (Takagi, *et al.*) **168,** 49

An immunohistochemical study of endocrine cells of the alimentary tract of the King's skink (*Egernia kingii*) (Arena, *et al.*) **170,** 73

Epidermal growth factor, Epidermal growth factor and its B-loop fragment are capable of promoting embryonic angiogenesis (Stewart) **170,** 242, *P*

Exogenous transforming growth factor α and epidermal growth factor can both stimulate growth of post-implantation rat embryos (Pratten) **173,** 210, *dem*

Epidermis, Langerhans-like cells in amphibian epidermis (Carrillo-Fargo, *et al.*) **172,** 39

Epididymis, Uptake of rhodamine 6GO into a specific zone of the mouse epididymis (Soler, *et al.*) **171,** 147

Epithelium, differentiation, Selective cytokeratin expression distinguishes oral, nasal and medial regional differentiation in cultured embryonic murine palatal epithelial sheets (Carette, *et al.*) **173,** 205, *dem*

Eye fetal, Subretinal macrophages in the normal human fetal eye (McMenamin & Loeffler) **173,** 230, *P*

Eye movements, Anatomical evidence that the paramedian pontine reticular formation participates in the oculomotor system of the rat (Cooper & Phillipson) **170,** 228, *P*

Face, development, Cranial base and growing face: integration or coincidence? (Dibbets) **173,** 238, *P*

Neural crest and facial clefts (Been, *et al.*) **173,** 247, *dem*

Face, growth, Interaction of cartilage and bone in facial growth (Verwoerd-Verhoef & Verwoerd) **173,** 235, *P*

Facial clefts, Neural crest and facial clefts (Been, *et al.*) **173,** 247, *dem*

Femoral nerve, Nerve supply of the human vastus medialis muscle (Thiranagama) **170,** 193

Femur, Femoral anteversion in healthy children. Application of a new method using ultrasound (Upadhyay, *et al.*) **169,** 49

Femur, head, Matrix vesicle involvement in cartilage mineralisation of organ-culture murine femoral head (Dickson, *et al.*) **173,** 242, *dem*

Fibroblasts, Comparison of adult oral mucosal and skin fibroblasts cultured on plastic and in contracted and non-contracted collagen gels – effects on matrix biosynthesis and Type VI collagen (Chambers, *et al.*) **173,** 204, *dem*

Fibrocartilage, Research Review. Fibrocartilage (Benjamin & Evans) **171,** 1

Fibrocartilage in the attachment zones of the quadriceps tendon and patellar ligament of man (Evans, *et al.*) **171,** 155

Histological studies on the triangular fibrocartilage complex of the wrist (Benjamin, *et al.*) **172,** 59

Fibronectin, Features of the aperiodic microfibrils associated with mouse dental basement membrane demonstrated by ultrastructural histochemistry (Ishizeki, *et al.*) **173,** 139

Fourier analysis, The effect of diet on bone shape in the mouse (Johnson, *et al.*) **172,** 213

Galago senegalensis, A morphological and morphometric study of the prosimian lung: the lesser bushbaby *Galago senegalensis* (Maina) **172,** 129

Galanin, Immunohistochemical localisation of galanin in the human brain (Gentleman, *et al.*) **170,** 229, *P*

Gallotia galloti, Neuropeptide tyrosine (NPY) and its C-terminal flanking peptide (C-PON) in the developing and adult spinal cord of a reptile (Marti, *et al.*) **172,** 149

Ganglia, autonomic, Autonomic ganglia: structure and organisation (Santer) **173,** 217, *P*

Gastrointestinal tract, An immunohistochemical study of endocrine cells of the alimentary tract of the King's skink (*Egernia kingii*) (Arena, *et al.*) **170,** 73

Exudate variation in the rabbit gastrointestinal tract: a scanning electron microscope study (Nunn, *et al.*) **170,** 87

Gastro-intestinal tract, Changes in intestinal cell proliferation, absorptive capacity and structure in young, adult and old rats (Goodlad & Wright) **173,** 109

Gastrointestinal ulceration, A novel epidermal growth factor-secreting cell lineage induced from human gastrointestinal mucosa by chronic ulceration (Wright, *et al.*) **170,** 246, *P*

Glomeruli, The peripolar cell: a distinctive cell type in the mammalian glomerulus. Morphological evidence from a study of sheep (Kelly, *et al.*) **168,** 217

Goat, The role of trophoblastic binucleate cells in implantation in the goat: a morphological study (Wango, *et al.*) **171,** 241

Gonadotropins, exogenous, Exogenous gonadotropins – serum oestrogen and progesterone and the effect on endometrial morphology in the rat (Kramer, *et al.*) **173,** 177

Granulated metrial gland cells, The detection of antigens and receptors on rat granulated metrial gland and placental cells *in vitro* (Peel & Adam) **173,** 214, *dem*

Monoclonal antibodies identifying intracellular antigens of mouse granulated metrial gland cells (Stewart, *et al.*) **173,** 214, *dem*

Growth factors, Insulin-like growth factor I: a possible maternally derived factor for post-implantation rat embryos (Jefferson, *et al.*) **173,** 202, *dem*

Exogenous transforming growth factor α and epidermal growth factor can both stimulate growth of post-implantation rat embryos (Pratten) **173,** 210, *dem*

Effect of growth factors on gingival fibroblast activity (Irwin, *et al.*) **173,** 211, *dem*

The effects of TGF-β_1 on mouse embryonic palate mesenchymal cell protein synthesis are modulated by the presence or absence of serum (Sharpe, *et al.*) **173,** 212, *dem*

Growth hormone, Effects of therapeutic levels of human growth hormone on mouse skeletal muscle (Mahon, *et al.*) **173,** 213, *dem*

Growth plate, Kinetic parameters in the growth plate of normal and achondroplastic (cn/cn) mice (Sannasgala & Johnson) **172,** 245

Haematopoiesis, Regulation of haematopoietic stem cell proliferation by stimulatory factors produced by murine fetal and adult liver (Dawood, *et al.*) **168,** 209

Haematopoietic stem cells, Haematopoietic stem cell proliferation regulators investigated using an *in vitro* assay of a primitive haematopoietic precursor (Robinson & Riches) **173,** 234, *P*

Hair cycle, Postnatal development of the hair cycle in the domestic pig (Watson & Moore) **170,** 1

Hair, development, Postnatal development of the hair cycle in the domestic pig (Watson & Moore) **170,** 1

Hassall's corpuscles, Immunoglobulins in Hassall's

corpuscles of the human thymus (Henry & Anderson) **168,** 185

Heart, Dynamic imaging of the interatrial septum by transoesophageal echocardiography and Doppler (Cambier, *et al.*) **173,** 246, *dem*

Fine structure of subendocardial (Purkinje) cells of the insect-eating bat (*Pipistrellus pipistrellus*) (Ayettey, *et al.*) **173,** 37

Heart, development, Looping of chick embryo hearts *in vitro* (Manning & McLachlan) **168,** 257

Heel pad, The mechanical properties of the human subcalcaneal fat pad in compression (Bennett & Ker) **171,** 131

Hip bone, Sexing of human hip bones (Milne) **172,** 221

Hip joint, Stabilisation of the hip joint during heelstrike: an EMG study (Morrenhof & Huson) **173,** 245, *dem*

Hip-joint, The medial and lateral muscle fans as stabilisers of the hip-joint (Morrenhof & Huson) **170,** 238, *P*

Homeobox genes, Analysis of homeobox genes in chick embryos (Scotting, *et al.*) **173,** 204, *dem*

Humerus, Variation of the axis of pronation of the forearm with rotation of the humerus (Evans & Barton) **173,** 232, *P*

Hyaluronan, A role for hyaluronan in joint development (Craig, *et al.*) **171,** 17

Hypoglossal nerve, The effects of hetero-reinnervation within the rat tongue (O'Reilly & O'Reilly) **169,** 71

Fibre composition of the hypoglossal nerve in the rat (O'Reilly & Fitzgerald) **172,** 227

Hypophysectomy, The supraoptic nucleus: a morphological and quantitative study in control and hypophysectomised rats (Crespo, *et al.*) **169,** 115

Hypothalamus, Morphometric analysis of the supraoptic nucleus in the human brain (Hofman, *et al.*) **172,** 259

Hypothyroidism, Estimates of volumes and pyramidal cell numbers in the prelimbic subarea of the prefrontal cortex in experimental hypothyroid rats (Madeira, *et al.*) **171,** 41

Ilium, The relationship between sex, body size and the auricular surface of the ilium (Ali) **170,** 237, *P*

Image analysis, 3D spatial and image analysis (Ripley) **170,** 218, *P*

Immune system, β-adrenergic stimulation, neuropeptides and the immune system (Heijnen, *et al.*) **173,** 218, *P*

Immunoglobulins, Immunoglobulins in Hassall's corpuscles of the human thymus (Henry & Anderson) **168,** 185

Implantation, The role of trophoblastic binucleate cells in implantation in the goat: a morphological study (Wango, *et al.*) **171,** 241

Inferior alveolar nerve, The number and size of axons central and peripheral to inferior alveolar nerve injuries in the cat (Holland & Robinson) **173,** 129

Innervation, The innervation of the adrenal gland. IV. Innervation of the rat adrenal medulla from birth to old age. A descriptive and quantitative morphometric and biochemical study of the innervation of chromaffin cells and adrenal medullary neurons in Wistar rats (Tomlinson & Coupland) **169,** 209

Nerve supply to the posterior longitudinal ligament and the intervertebral disc of the rat vertebral column as studied by acetylcholinesterase histochemistry. I. Distribution in the lumbar region (Kojima, *et al.*) **169,** 237

Nerve supply to the posterior longitudinal ligament and the intervertebral disc of the rat vertebral column as studied by acetylcholinesterase histochemistry. II. Regional differences in the distribution of the nerve fibres and their origins (Kojima, *et al.*) **169,** 247

Insulin-like growth factor I, Insulin-like growth factor I: a possible maternally derived factor for post-implantation rat embryos (Jefferson, *et al.*) **173,** 202, *dem*

Interatrial septum, Dynamic imaging of the interatrial septum by transoesophageal echocardiography and Doppler (Cambier, *et al.*) **173,** 246, *dem*

Intervertebral disc, Nerve supply to the posterior longitudinal ligament and the intervertebral disc of the rat vertebral column as studied by acetylcholinesterase histochemistry. I. Distribution in the lumbar region (Kojima, *et al.*) **169,** 237

Nerve supply to the posterior longitudinal ligament and the intervertebral disc of the rat vertebral column as studied by acetylcholinesterase histochemistry. II. Regional differences in the distribution of the nerve fibres and their origins (Kojima, *et al.*) **169,** 247

Intestine, An immunohistochemical study of endocrine cells of the alimentary tract of the King's skink (*Egernia kingii*) (Arena, *et al.*) **170,** 73

Exudate variation in the rabbit gastrointestinal tract: a scanning electron microscope study (Nunn, *et al.*) **170,** 87

The ultrastructure of the serosal surface of mouse intestine (Ettarh, *et al.*) **173,** 242, *dem*

Intestine, healing, Urogastrone binding at sites of increased cell proliferation and wound healing in the intestine (Saxena, *et al.*) **173,** 210, *dem*

Intestine, small, An immunohistochemical study of endocrine cells in the proximal duodenum of eight marsupial species (Takagi, *et al.*) **168,** 49

Variations in exudate associated with dietary fat in the rat small intestine (Nunn, *et al.*) **170,** 251, *dem*

A microscopical study of the persorption of iron particles in rat jejunum (McCullough & Carr) **170,** 252, *dem*

Intestinal morphology – assessing differences in normal mice using a mathematical model (Carr, *et al.*) **170,** 259, *dem*

Changes in intestinal cell proliferation, absorptive capacity and structure in young, adult and old rats (Goodlad & Wright) **173,** 109

The effects of a single and a double period of food restriction on the rat small intestine (Warren & Akbar) **173,** 213, *dem*

Stromal relationships in normal and irradiated mouse small intestine (Lee, *et al.*) **173,** 215, *dem*

Morphologically and neurochemically distinct

neuronal populations in the enteric nervous system (ENS) of the porcine small intestine (Timmermans, *et al.*) **173,** 219, *P*

Intestine, small, nerve supply, Electron microscopic study of met-enkephalin-immunoreactive neurons in the enteric nervous system of the porcine small intestine (Scheuermann, *et al.*) **173,** 221, *P*

Intestine, villi, Differences and similarities in the structure and vasculature of the intestinal villus between sites, strains and species (Abbas, *et al.*) **173,** 241, *dem*

Intrafusal fibres, Classification of the intrafusal muscle fibres in the frog muscle spindle: histochemical and immunofluorescent studies (Yoshimura, *et al.*) **172,** 89

Islets of Langerhans, A survey of endocrine cells in the pancreas of the echidna (*Tachyglossus aculeatus*) with special reference to pancreatic motilin cells (Yamada, *et al.*) **171,** 223

Jejunum, A microscopical study of the persorption of iron particles in rat jejunum (McCullough & Carr) **170,** 252, *dem*

Joints, development, A role for hyaluronan in joint development (Craig, *et al.*) **171,** 17

Keratinisation, Fine structure of the dorsal epithelium of the mongoose tongue (Iwasaki & Miyata) **172,** 201

Kidney, Histochemical localisation of alkaline phosphate in the thick basal laminae of kidney cells of the gerbil *Meriones crassus* (Safer & Abu-Salem) **173,** 201, *dem*

Possible origin of the membrane-bound bodies of the thick basal laminae of kidney cells of the gerbil *Meriones crassus* (Safer & Abu-Salem) **173,** 201, *dem*

Kidney, development, N-linked oligosaccharides during human renal organogenesis (Fleming) **170,** 151

Knee joint, Comparative morphology of the lateral meniscus of the knee in primates (Le Minor) **170,** 161

Fine vascular anatomy of adult rabbit knee ligaments (Bray, *et al.*) **172,** 69

Langerhans cells, Langerhans-like cells in amphibian epidermis (Carrillo-Fargo, *et al.*) **172,** 39

Laryngo-tracheal recess, The laryngeal primordium and epithelial lamina. A new interpretation (Sañudo & Domenech-Mateu) **171,** 207

Larynx, A metrical study of the laryngeal skeleton in adult Nigerians (Ajmani) **171,** 187

Larynx, development, The laryngeal primordium and epithelial lamina. A new interpretation (Sañudo & Domenech-Mateu) **171,** 207

Larynx, innervation, Characterisation of afferent projections to the nucleus ambiguus of the rat by means of fluorescent double labelling (Núñez-Abades, *et al.*) **172,** 1

Lectins, Lectin labelling of amoeboid microglial cells in the brain of postnatal rats (Kaur, *et al.*) **173,** 151

Leprosy, Nerve damage in leprosy (Crawford & Hobbs) **170,** 232, *P*

Leydig cells, Involution of human fetal Leydig cells. An immunohistochemical, ultrastructural and quantitative study (Codesal, *et al.*) **172,** 103

Ligaments, Fibrocartilage in the attachment zones of the quadriceps tendon and patellar ligament of man (Evans, *et al.*) **171,** 155

Measurements of calcified tissue at the attachment zone of tendons and ligaments in man (Evans, *et al.*) **173,** 241, *dem*

Ligaments, blood supply, Fine vascular anatomy of adult rabbit knee ligaments (Bray, *et al.*) **172,** 69

Limbs, development, The pattern and differentiation of the developing vasculature in the chick hind limb (McNeill, *et al.*) **170,** 253, *dem*

What factors are involved in limb morphogenesis? (Wolpert) **173,** 208, *dem*

Limb-bud placodes: sources of cells for developing limbs (Hartwig, *et al.*) **173,** 229, *P*

Liver, Regulation of haematopoietic stem cell proliferation by stimulatory factors produced by murine fetal and adult liver (Dawood, *et al.*) **168,** 209

Lumbrical muscles, Individual differences in multiple-bag spindles of cat superficial lumbrical muscles (Decorte, *et al.*) **169,** 1

Lung, Morphology of presumptive rapidly adapting receptors in the rat bronchus (Kappagoda, *et al.*) **168,** 265

Surface morphology of the terminal bronchiolus of prenatal and adult cats (Al-Tikriti & Henry) **173,** 243, *dem*

Lung, prosimian, A morphological and morphometric study of the prosimian lung: the lesser bush-baby *Galago senegalensis* (Maina) **172,** 129

Lungs, blood supply, The development of the vascular system in the lung: implications for collateral arteries (De Ruiter, *et al.*) **173,** 229, *P*

Lymph nodes, Arterial supply to the lumbar lymph nodes in man (Sasaki) **168,** 229

Lymphatics, The distribution of lymphatic stomata in the diaphragm of the golden hamster (Fukuo, *et al.*) **169,** 13

Macrognathus siamensis, The structure and ultrastructure of the rostral cartilage in the spiny eel, *Macrognathus siamensis* (Teleostei: Mastacembeloidei) (Benjamin & Sandhu) **169,** 37

Macrophages, Response of intraventricular macrophages to crotoxin-coated microcarrier beads injected into the lateral ventricle of postnatal rats (Kaur, *et al.*) **168,** 63

Mandible, Mandibular morphology as a prediction tool for mandibular third molar impaction (Maertens & Van Der Linden) **173,** 236, *P*

Mandible, condyle, An immunohistochemical study of the distribution of matrical proteins in the mandibular condyle of neonatal mice. I. Collagens (Silberman & Von der Mark) **170,** 11

An immunohistochemical study of the distribution of matrical proteins in the mandibular condyle of neonatal mice. II. Non-collagenous proteins (Silberman, *et al.*) **170,** 23

Masseter, Histochemical and functional fibre typing of the rabbit masseter muscle (Bredman, *et al.*) **168,** 31

Meckel's cartilage, The repair and developmental effects of fracture on Meckel's cartilage in the chick embryo (Cousely) **170,** 239, *P*

The involvement of Meckel's cartilage in hemifacial microsomia (Cousley & Wilson) **173,** 248, *dem*

Medulla, cultured, Formation of synapses in cerebellar explants by axons from co-cultured media (Bird) **173,** 77

Melanocytes, Ultrastructure of melanocytes in normal individuals and patients with alopecia areata (Robin, *et al.*) **170,** 246, *P*

Membrane bone, Ultrastructure of the periosteum from membrane bone (Squier, *et al.*) **171,** 233

Meniscus, lateral, Comparative morphology of the lateral meniscus of the knee in primates (Le Minor) **170,** 161

Mesonephros, The development of mesonephric tubules and their possible contribution to gonadal and adrenal cortical anlagen in the CBA mouse (Smith) **170,** 240, *P*

Mesothelial cells, Characterisation of mesothelial cells in peritoneal dialysate (Stephenson, *et al.*) **173,** 233, *P*

Metrial gland, Immunoglobulin G receptors on cells of the mouse metrial gland (Daki, *et al.*) **173,** 214, *dem*

The detection of antigens and receptors on rat granulated metrial gland and placental cells *in vitro* (Peel & Adam) **173,** 214, *dem*

Monoclonal antibodies identifying intracellular antigens of mouse granulated metrial gland cells (Stewart, *et al.*) **173,** 214, *dem*

The morphology of cultured metrial gland explants and their emigrant granulated metrial gland cells (Mukhtar & Stewart) **170,** 235, *P*

Interaction of rat and mouse granulated metrial gland cells with immunoglobulin G and albumin *in vitro* (Adam & Peel) **170,** 250, *dem*

Microglia, Lectin labelling of amoeboid microglial cells in the brain of postnatal rats (Kaur, *et al.*) **173,** 151

Microvilli, A sampling scheme intended for tandem measurements of sodium transport and microvillous surface area in the coprodaeal epithelium of hens on high- and low-salt diets (Mayhew, *et al.*) **173,** 19

Enhanced sodium (Na) transport in the lower intestine of hens on a low-salt (LS) diet is accompanied by an increase in the surface area of microvilli (Sødring-Elbrønd, *et al.*) **173,** 234, *P*

Middle ear, The innervation of the middle ear muscles of the rat (Van der Berge & Van der Wal) **170,** 99

Mineralisation, Morphological aspects of rat metaphyseal cartilage pericellular matrix (Quacci, *et al.*) **171,** 193

Mitral valve, Bicuspid valve innervation patterns (Folan, *et al.*) **170,** 250, *dem*

Molar, third, Mandibular morphology as a prediction tool for mandibular third molar impaction (Maertens & Van Der Linden) **173,** 236, *P*

Mongoose, Fine structure of the dorsal epithelium of the mongoose tongue (Iwasaki & Miyata) **172,** 201

Monoptychic glands, The monoptychic glands of the jugulo-sternal scent gland field of *Tupaia*: a TEM and SEM study (Zeller & Richter) **172,** 25

Morphometry, The effect of diet on bone shape in the mouse (Johnson, *et al.*) **172,** 213

Motilin, A survey of endocrine cells in the pancreas of the echidna (*Tachyglossus aculeatus*) with special reference to pancreatic motilin cells (Yamada, *et al.*) **171,** 223

Motoneurons, The arrangement of forearm motoneurons in young and adult rats and the possibility of naturally occurring motoneuron death (Scarisbrick, *et al.*) **171,** 57

Spinal cord location of the motoneurons innervating the tail muscles of the cat (Wada, *et al.*) **173,** 101

Motor end-plates, Branching patterns of the motor nerve endings in a skeletal muscle of the adult rat (Tomas, *et al.*) **168,** 123

Motor nerves, The effect of separation from the target muscle on the survival of developing motoneurons (Lowrie) **170,** 231, *P*

Movement analysis, The engineering approach to the measurement and analysis of human movement (Kenedi) **170,** 217, *P*

Muscle, cardiac, The cyclo-oxygenase inhibitor fenbufen blocks clenbuterol-induced hypertrophy of cardiac but not skeletal muscle (Maltin, *et al.*) **173,** 208, *dem*

Muscle, development, The use of a replication deficient retrovirus to mark cells during muscle development (Wigmore & Martin) **170,** 234, *P*

Muscle fibres, large, An enzyme histochemical study of large muscle fibres in the neonatal mouse (Christie, *et al.*) **170,** 139

Muscle, regeneration, Branching patterns of the motor nerve endings in a skeletal muscle of the adult rat (Tomas, *et al.*) **168,** 123

Endothelial cell activation during angiogenesis in freely transplanted skeletal muscles in mice and its relationship to the onset of myogenesis (Roberts & McGeachie) **169,** 197

Muscle, smooth, The three-dimensional structure of the musculature and the nerve elements in the rabbit ureter (Tahara) **170,** 183

Distribution of acetylcholinesterase in the nerve endings of chicken *m. retractor phalli cranialis* (Ohsawa, *et al.*) **170,** 63

Muscle, striated, Branching patterns of the motor nerve endings in a skeletal muscle of the adult rat (Tomas, *et al.*) **168,** 123

Systematic distribution of muscle fibre types in the rat and rabbit diaphragm: a morphometric and ultrastructural analysis (Kilarski & Sjöstrom) **168,** 13

Histochemical and functional fibre typing of the rabbit masseter muscle (Bredman, *et al.*) **168,** 31

Numerical and areal density estimates of fibre type composition in a skeletal muscle (rat extensor digitorum longus) (Egginton) **168,** 73

An enzyme histochemical study of large muscle fibres in the neonatal mouse (Christie, *et al.*) **170,** 139

The effects of genetic sex and androgens on skeletal

muscle tissue (Stickland & O'Shaughnessy) **170,** 234, *P*
Histological and histochemical studies of the rat intercostal muscles following selective nerve root excisions (Msamati) **170,** 234, *P*
Classification of the intrafusal muscle fibres in the frog muscle spindle: histochemical and immunofluorescent studies (Yoshimura, *et al.*) **172,** 89
The importance of contractile activity in the prevention of connective tissue changes in immobilised muscle (Williams) **173,** 201, *dem*
Effects of therapeutic levels of human growth hormone on mouse skeletal muscle (Mahon, *et al.*) **173,** 213, *dem*
Preparation techniques for automatic counting of skeletal muscle fibres (Stickland, *et al.*) **173,** 243, *dem*
Skeletal muscle fibre number in the rat from youth to adulthood (Timson & Dudenhoeffer) **173,** 33

Muscle, striated, development, Cell lineage in muscle development (Wigmore) **173,** 203, *dem*

Muscle, striated, exercise effects, Spatial distribution of exercise-induced muscle damage in the rat soleus muscle (Van Der Meulen, *et al.*) **173,** 245, *dem*

Myenteric plexus, An immunohistochemical study of the myenteric plexus of the colon in the rat and mouse (Heinicke & Kiernan) **170,** 51

Nasal septum, Ossification of the human nasal septum (Van Loosen, *et al.*) **173,** 235, *P*

Natrix maura, A morphological study of the tracheal epithelium of the snake *Natrix maura* (Pastor) **172,** 47

Neocortex, The thalamic projection to the sensory neocortex of the porpoise, *Phocoena phocoena* (Revishchin & Garey) **169,** 85

Neocortex, damage, Changes in gene expression in the neocortex of the rat following local damage (Showell) **170,** 226, *P*

Nerve damage, The effect of separation from the target muscle on the survival of developing motoneurons (Lowrie) **170,** 231, *P*

Nerve injuries, Cell counts in the trigeminal ganglion of the cat after inferior alveolar nerve injuries (Holland & Robinson) **171,** 179
The number and size of axons central and peripheral to inferior alveolar nerve injuries in the cat (Holland & Robinson) **173,** 129

Nerve regeneration, The effects of hetero-reinnervation within the rat tongue (O'Reilly & O'Reilly) **169,** 71
Reinnervation of developing rat molars (Johnston) **170,** 231, *P*
The number and size of axons central and peripheral to inferior alveolar nerve injuries in the cat (Holland & Robinson) **173,** 129

Nerve section, Cell counts in the trigeminal ganglion of the cat after inferior alveolar nerve injuries (Holland & Robinson) **171,** 179

Nervous system, autonomic, Autonomic nervous transmission (Burnstock) **173,** 217, *P*
Changes in uptake of serotonin into sympathetic perivascular nerves in old age (Violet & Cowen) **173,** 220, *P*

Neural tube, Variation in the response of chick embryos to incision of the roof plate of the neural tube at different developmental stages (Clarke & Scothorne) **168,** 167

Neuroendocrine cells, Serotonin-, somatostatin- and chromogranin A-containing cells of the urethro-prostatic complex in sheep. An immunocytochemical and immunofluorescent study (Vittoria, *et al.*) **171,** 169

Neuroepithelium, Appearance of laminin, heparan sulphate proteoglycan and collagen Type IV during initial stages of vascularisation of the neuroepithelium of the mouse embryo (Herken, *et al.*) **169,** 189

Neurofilament protein, Early neuronal development in the spinal cord of a reptile assessed by neurofilament protein immunoreactivity (Marti, *et al.*) **173,** 119

Neuroglia, An ultrastructural study of the development of astrocytes in the midbrain of the lizard (Monzon-Mayor, *et al.*) **170,** 33
An ultrastructural study of the development of oligodendrocytes in the midbrain of the lizard (Monzon-Mayor, *et al.*) **170,** 43

Neurohypophysis, Morphometric analysis of nerve endings isolated from bovine and rat neurohypophysis (Toescu & Morris) **173,** 1

Neuroma, sympathetic axons, Localisation of noradrenergic sympathetic axons in experimental neuromas by X-ray microanalysis (Small, *et al.*) **173,** 240, *dem*

Neuromuscular junction, Distribution of acetylcholinesterase in the nerve endings of chicken *m. retractor phalli cranialis* (Ohsawa, *et al.*) **170,** 63

Neuromuscular spindles, Individual differences in multiple-bag spindles of cat superficial lumbrical muscles (Decorte, *et al.*) **169,** 1
Comment (Walro & Kucera) **171,** 259
Reply to Comment (Gladden) **171,** 265
Classification of the intrafusal muscle fibres in the frog muscle spindle: histochemical and immunofluorescent studies (Yoshimura, *et al.*) **172,** 89

Neurons, Synapse-to-neuron ratios in rat cerebellar cortex following lengthy periods of undernutrition (Warren & Bedi) **170,** 173

Neurons, development, Early neuronal development in the spinal cord of a reptile assessed by neurofilament protein immunoreactivity (Marti, *et al.*) **173,** 119

Neuropeptides, The neurotransmitters and neuropeptides in the anterior major pelvic ganglion of the male guinea-pig (Dhami) **170,** 232, *P*
The morphology, neurotransmitter and neuropeptide content of the paracervical ganglion of the marmoset (*Callithrix jaccus*) (Mitchell & Stauber) **170,** 233, *P*
An immunohistochemical study of the myenteric plexus of the colon in the rat and mouse (Heinicke & Kiernan) **170,** 51
Neuropeptide tyrosine (NPY) and its C-terminal flanking peptide (C-PON) in the developing and adult spinal cord of a reptile (Marti, *et al.*) **172,** 149
Morphological, histochemical and immunohistological studies of the paracervical ganglion in

prepubertal, pregnant and adult, non-pregnant guinea-pigs (Mitchell & Stauber) **172,** 177

β-adrenergic stimulation, neuropeptides and the immune system (Heijnen, *et al.*) **173,** 218, *P*

Neuropore, Mesenchymal–epithelial interaction during *in vitro* closure of the posterior neuropore in Swiss Webster and *curly tail* mouse (Van Straaten, *et al.*) **173,** 244, *dem*

Neurosecretosomes, Morphometric analysis of nerve endings isolated from bovine and rat neurohypophysis (Toescu & Morris) **173,** 1

Neurotransmitters, The neurotransmitters and neuropeptides in the anterior major pelvic ganglion of the male guinea-pig (Dhami) **170,** 232, *P*

The morphology, neurotransmitter and neuropeptide content of the paracervical ganglion of the marmoset (*Callithrix jaccus*) (Mitchell & Stauber) **170,** 233, *P*

Neurotubules, Studies on the spatial pattern of neurotubules in normal and diabetic mice (Dockery, *et al.*) **173,** 205, *dem*

Nodes of Ranvier, High density of nodes of Ranvier in the CNS–PNS transitional zone (Fraher & Bristol) **170,** 131

Nucleus ambiguus, Characterisation of afferent projections to the nucleus ambiguus of the rat by means of fluorescent double labelling (Núñez-Abades, *et al.*) **172,** 1

A comparison of age-related changes in neuron number in the dorsal motor nucleus of the vagus and the nucleus ambiguus of the mouse (Sturrock) **173,** 169

Obituaries, In Memoriam: Hans Kuypers (Lemon) **169,** 271

In Memoriam: Robert Barer (Williams) **170,** 203

In Memoriam: Andrew W. Rogers (Williams) **170,** 207

In Memoriam: Graham Weddell (Miller) **173,** 193 193

Occipital emissary foramen, Anatomical Note. Occipital emissary foramen in Indian skulls (Premsagar, *et al.*) **173,** 187

Oculomotor nerve, Simultaneous cell death in the trigeminal ganglion and in ganglion neurons present in the oculomotor nerve of the bovine fetus (Bortolami, *et al.*) **169,** 103

Oesophagus, The effects of irradiation on the bacterial colonisation of the rabbit oesophagus: a scanning electron microscope study (Nunn, *et al.*) **170,** 252, *dem*

Oesophagus, epithelium, The acute effects of γ-irradiation on the oesophageal epithelium of the rabbit – a scanning electron microscope study (Shasha'a, *et al.*) **173,** 241, *dem*

Oestrus cycle, Changes in vasoactive intestinal polypeptide (VIP) levels in the rabbit oviduct at different hormonal stages. An immunohistochemical study (Menghi, *et al.*) **171,** 139

Oligodendrocytes, development, An ultrastructural study of the development of oligodendrocytes in the midbrain of the lizard (Monzon-Mayor, *et al.*) **170,** 43

Optic nerve, Localisation of calcium ions and calcium ATPase activity in axons of the adult guinea-pig optic nerve (Maxwell, *et al.*) **173,** 224, *P*

Orbit, The groove in the orbital face of the greater wing of the sphenoid. A new interpretation (Diamond) **173,** 97

Ossification, The development of centres of ossification of bones forming elbow joints in young swine (Visco, *et al.*) **171,** 25

Ossification in membrane, Ultrastructure of the periosteum from membrane bone (Squier, *et al.*) **171,** 233

Osteoclasts, Calcitonin-induced area reduction and the associated cytoskeletal rearrangements in rat osteoclasts *in vitro* (Clinton, *et al.*) **170,** 253, *dem*

Ovary development, Testis-conditioned media influence the differentiation of mouse ovaries *in vitro* (Tavendale, *et al.*) **170,** 238, *P*

Oviduct, Changes in vasoactive intestinal polypeptide (VIP) levels in the rabbit oviduct at different hormonal stages. An immunohistochemical study (Menghi, *et al.*) **171,** 139

Oxytocin, Morphometric study on the development of magnocellular neurons of the supraoptic nucleus utilising immunohistochemical methods (Lazcano, *et al.*) **168,** 1

Palate, closure, Developmental mechanisms of palatal closure (Ferguson) **173,** 238, *P*

Palate, development, Comparative biochemistry of mouse and chick secondary palate development *in vivo* and *in vitro* with particular emphasis on extracellular matrix molecules and the effects of growth factors on their synthesis (Foreman, *et al.*) **173,** 211, *dem*

Changes in the composition of glycosaminoglycans during palatogenesis (Singh, *et al.*) **173,** 212, *dem*

Palate, surgery, Manipulation of wound-healing after palatal surgery in dogs (In De Braekt, *et al.*) **173,** 236, *P*

Paracervical ganglia, Morphological, histochemical and immunohistological studies of the paracervical ganglion in prepubertal, pregnant and adult, non-pregnant guinea-pigs (Mitchell & Stauber) **172,** 177

Paraneurons, Serotonin-, somatostatin- and chromogranin A-containing cells of the urethroprostatic complex in sheep. An immunocytochemical and immunofluorescent study (Vittoria, *et al.*) **171,** 169

Parkinsonism, Muscarinic supersensitivity in the globus pallidus of MPTP-treated monkeys, revealed using (3H)-QNB autoradiography (Mellor & Crossman) **170,** 226, *P*

Parkinson's disease, Transplantation of the adrenal medulla into the caudate nucleus as a treatment for Parkinson's disease: a 1 year follow-up (Carmichael, *et al.*) **173,** 226, *P*

Patella, The blood supply to the patella (Brookes, *et al.*) **170,** 238, *P*

Peripolar cells, The peripolar cell: a distinctive cell type in the mammalian glomerulus. Morphological evidence from a study of sheep (Kelly, *et al.*) **168,** 217

Peritoneal dialysis, Characterisation of mesothelial cells in peritoneal dialysate (Stephenson, *et al.*) **173,** 233, *P*

Perivascular spaces, Interrelationships of the pia

mater and the perivascular (Virchow–Robin) spaces in the human cerebrum (Zhang, *et al.*) **170,** 111

Persorption, Persorption: a microscopical study (McCullough, *et al.*) **173,** 233, *P*

Phagocytes, Lectin labelling of amoeboid microglial cells in the brain of postnatal rats (Kaur, *et al.*) **173,** 151

Pharynx, innervation, Characterisation of afferent projections to the nucleus ambiguus of the rat by means of fluorescent double labelling (Núñez-Abades, *et al.*) **172,** 1

Pia mater, Interrelationships of the pia mater and the perivascular (Virchow–Robin) spaces in the human cerebrum (Zhang, *et al.*) **170,** 111

Pigeon, feeding, Functional anatomy of the feeding apparatus of the pigeon (Berkhoudt) **173,** 239, *P*

Pineal gland, The megachiropteran pineal organ: a comparative morphological and volumetric investigation with special emphasis on the remarkably large pineal of *Dobsonia praedatrix* (Bhatnagar, *et al.*) **168,** 143

Pituitary gland, Morphometric analysis of nerve endings isolated from bovine and rat neurohypophysis (Toescu & Morris) **173,** 1

Placenta, A morphometric study on placental diffusing capacity for oxygen in maternal diabetes (Jackson, *et al.*) **170,** 248, *dem*

Endocytosis of HRP-labelled immunoglobulin-G by the syncytiotrophoblast of the perfused human placenta (Leach, *et al.*) **170,** 248, *dem*

Plasminogen activator, Identification of plasminogen activator activity in human osteoblasts using a single cell assay: effects of retinoic acid and parathyroid hormone-related peptide (Sivayoham) **170,** 236, *P*

Pneumatisation, The development of pneumatisation in the skull of the domestic fowl (*Gallus gallus domesticus*) (Hogg) **169,** 139

Porpoise, The thalamic projection to the sensory neocortex of the porpoise, *Phocoena phocoena* (Revishchin & Garey) **169,** 85

Posterior longitudinal ligament, Nerve supply to the posterior longitudinal ligament and the intervertebral disc of the rat vertebral column as studied by acetylcholinesterase histochemistry. I. Distribution in the lumbar region (Kojima, *et al.*) **169,** 237

Nerve supply to the posterior longitudinal ligament and the intervertebral disc of the rat vertebral column as studied by acetylcholinesterase histochemistry. II. Regional differences in the distribution of the nerve fibres and their origins (Kojima, *et al.*) **169,** 247

Pregnancy, Morphological, histochemical and immunohistological studies of the paracervical ganglion in prepubertal, pregnant and adult, non-pregnant guinea-pigs (Mitchell & Stauber) **172,** 177

Exogenous gonadotropins – serum oestrogen and progesterone and the effect on endometrial morphology in the rat (Kramer, *et al.*) **173,** 177

Primates, Comparative morphology of the lateral meniscus of the knee in primates (Le Minor) **170,** 161

Primitive cortex, Estimates of volumes and pyramidal cell numbers in the prelimbic subarea of the prefrontal cortex in experimental hypothyroid rats (Madeira, *et al.*) **171,** 41

Proboscis, The proboscis and its contribution to the roof of the median orbit in human cyclopia (McGrath) **173,** 231, *P*

Prolactin receptors, Prolactin receptors in the primate choroid plexus (Walsh, *et al.*) **168,** 137

Pronation, Variation of the axis of pronation of the forearm with rotation of the humerus (Evans & Barton) **173,** 232, *P*

Pronephros, The developing pronephros in the Chelonian *Caretta caretta* (Collins, *et al.*) **170,** 240, *P*

Prostate, Serotonin-, somatostatin- and chromogranin A-containing cells of the urethroprostatic complex in sheep. An immunocytochemical and immunofluorescent study (Vittoria, *et al.*) **171,** 169

Protein metabolism, Are polyamines indicators of protein metabolism? (Bardocz, *et al.*) **173,** 210, *dem*

Proteoglycans, Appearance of laminin, heparan sulphate proteoglycan and collagen Type IV during initial stages of vascularisation of the neuroepithelium of the mouse embryo (Herken, *et al.*) **169,** 189

Proteoglycan: collagen interactions and subfibrillar structure in collagen fibrils. Implications in the development and ageing of connective tissues (Scott) **169,** 23

Ultrastructural visualisation of proteoglycans in early unmineralised dentine of rat tooth germs stained with cuprolinic blue (Tenorio, *et al.*) **169,** 257

Protofibrils, Proteoglycan: collagen interactions and subfibrillar structure in collagen fibrils. Implications in the development and ageing of connective tissues (Scott) **169,** 23

Purkinje cells, Fractionator studies on Purkinje cells in the human cerebellum: numbers in right and left halves of male and female brains (Mayhew, *et al.*) **169,** 63

Fine structure of subendocardial (Purkinje) cells of the insect-eating bat (*Pipistrellus pipistrellus*) (Ayettey, *et al.*) **173,** 37

Quadriceps femoris, Nerve supply of the human vastus medialis muscle (Thiranagama) **170,** 193

Histological studies on the attachment zone of the quadriceps tendon and patellar ligament in man (Evans, *et al.*) **170,** 257, *dem*

Rat embryos, Insulin-like growth factor I: a possible maternally derived factor for post-implantation rat embryos (Jefferson, *et al.*) **173,** 202, *dem*

Reinnervation, The effects of hetero-reinnervation within the rat tongue (O'Reilly & O'Reilly) **169,** 71

Reticular formation, Anatomical evidence that the paramedian pontine reticular formation participates in the oculomotor system of the rat (Cooper & Phillipson) **170,** 228, *P*

Retinoids, synthetic, Early patterns of humeral and

femoral remodelling in the rat induced by the synthetic retinoid N-ethylretinamide (NER) (Turton, *et al.*) **170,** 236, *P*

Retrofacial nucleus, A comparison of age-related changes in neuron number in the dorsal motor nucleus of the vagus and the nucleus ambiguus of the mouse (Sturrock) **173,** 169

Sacroiliac joint, Effects of pelvic belt application on sacroiliac joint mobility (Buyruk, *et al.*) **173,** 228, *P*

Sampling for stereology, A sampling scheme intended for tandem measurements of sodium transport and microvillous surface area in the coprodaeal epithelium of hens on high- and low-salt diets (Mayhew, *et al.*) **173,** 19

Scent glands, The monoptychic glands of the jugulosternal scent gland field of *Tupaia*: a TEM and SEM study (Zeller & Richter) **172,** 25

Sex determination, Sexing of human hip bones (Milne) **172,** 221

Sexual dimorphism, Morphometry of the adult human corpus callosum: lack of sexual dimorphism (Going & Dixson) **171,** 163

Morphometric studies on the development and sexual dimorphism of the submandibular gland of the mouse (Jayasinghe, *et al.*) **172,** 115

Morphometric analysis of the supraoptic nucleus in the human brain (Hofman, *et al.*) **172,** 259

Shell-less culture, Growth of the chick area vasculosa *in ovo* and in shell-less culture (Stewart, *et al.*) **172,** 81

Skeleton, pathology, Marks of pathology on sixteenth century skeletal remains (Uytterschaut) **173,** 229, *P*

Skin, dermis, The differentiation of the dermis (Lapière) **173,** 198, *P*

Skull, The development of pneumatisation in the skull of the domestic fowl (*Gallus gallus domesticus*) (Hogg) **169,** 139

Anatomical Note. Occipital emissary foramen in Indian skulls (Premsagar, *et al.*) **173,** 187

Skull, development, Immunohistochemical assessment of cranial suture development in rats (Alberius & Johnell) **173,** 61

Snake, A morphological study of the tracheal epithelium of the snake *Natrix maura* (Pastor) **172,** 47

Sphenoid, greater wing, The groove in the orbital face of the greater wing of the sphenoid. A new interpretation (Diamond) **173,** 97

Spinal cord, The arrangement of forearm motoneurons in young and adult rats and the possibility of naturally occurring motoneuron death (Scarisbrick, *et al.*) **171,** 57

Neuropeptide tyrosine (NPY) and its C-terminal flanking peptide (C-PON) in the developing and adult spinal cord of a reptile (Marti, *et al.*) **172,** 149

Spinal cord location of the motoneurons innervating the tail muscles of the cat (Wada, *et al.*) **173,** 101

Spinal cord, development, Early neuronal development in the spinal cord of a reptile assessed by neurofilament protein immunoreactivity (Marti, *et al.*) **173,** 119

Spinal nerves, High density of nodes of Ranvier in the CNS–PNS transitional zone (Fraher & Bristol) **170,** 131

Stapedius, The innervation of the middle ear muscles of the rat (Van der Berge & Van der Wal) **170,** 99

Stereology, Three dimensional measurements using random geometrical probes (Howard) **170,** 213, *P*

Sampling designs leading to efficient and unbiased estimates of particle size and number (Gundersen) **170,** 214, *P*

Three-dimensional data in whole body structures (Herman) **170,** 215, *P*

Anisotropic structures: models and sampling designs (Mattfeldt) **170,** 216, *P*

Comparative morphometry of the mammalian brain: estimates of cerebral volumes and cortical surface areas obtained from macroscopic slices (Mayhew, *et al.*) **172,** 191

A sampling scheme intended for tandem measurements of sodium transport and microvillous surface area in the coprodaeal epithelium of hens on high- and low-salt diets (Mayhew, *et al.*) **173,** 19

Enhanced sodium (Na) transport in the lower intestine of hens on a low-salt (LS) diet is accompanied by an increase in the surface area of microvilli (Sødring-Elbrønd, *et al.*) **173,** 234, *P*

Sternocleidomastoid, Localisation of the nuclei of origin of efferent nerve fibres to the sternocleidomastoid/trapezius muscle group in the rat (Rintoul) **170,** 230, *P*

Stomach, nerve supply, The non-adrenergic, non-cholinergic (NANC) innervation of the ruminant stomach of the fetal sheep: some morphological aspects (Weyns, *et al.*) **173,** 222, *P*

The non-adrenergic, non-cholinergic (NANC) innervation of the ruminant stomach of the adult sheep: some functional aspects (Ooms, *et al.*) **173,** 223, *P*

Subchondral plate, The structure of vascular channels in the subchondral plate (Clark) **171,** 105

Subendocardial cells, Fine structure of subendocardial (Purkinje) cells of the insect-eating bat (*Pipistrellus pipistrellus*) (Ayettey, *et al.*) **173,** 37

Submandibular gland, Morphometric studies on the development and sexual dimorphism of the submandibular gland of the mouse (Jayasinghe, *et al.*) **172,** 115

Subpial spaces, Interrelationships of the pia mater and the perivascular (Virchow–Robin) spaces in the human cerebrum (Zhang, *et al.*) **170,** 111

Substantia nigra, Changes in gene expression in the substantia nigra following damage of the ipsilateral striatum in the rat (Najlerahim, *et al.*) **170,** 226, *P*

Supraoptic nucleus, Morphometric study on the development of magnocellular neurons of the supraoptic nucleus utilising immunohistochemical methods (Lazcano, *et al.*) **168,** 1

The supraoptic nucleus: a morphological and quantitative study in control and hypophysectomised rats (Crespo, *et al.*) **169,** 115

Morphometric analysis of the supraoptic nucleus in the human brain (Hofman, *et al.*) **172,** 259

Suprarenal gland, nerve supply, The innervation of the adrenal gland. IV. The source of pre- and postganglionic nerve fibres to the guinea-pig adrenal gland (Parker, *et al.*) **172,** 17

Sutures, Immunohistochemical assessment of cranial suture development in rats (Alberius & Johnell) **173,** 61

Sutures, growth, The influence of forces on sutural growth *in vitro* (Wolters-Lutgerhorst, *et al.*) **173,** 247, *dem*

Sympathetic ganglia, Quantitative analysis of the microvasculature of pelvic sympathetic ganglia in young and aged rats. (Griffiths & Santer) **170,** 249, *dem*

The effect of age on succinate dehydrogenase activity in neurons of the rat nodose ganglion determined by a quantitative enzyme histochemical method (Baker & Santer) **170,** 250, *dem*

Synapses, Synapse-to-neuron ratios in rat cerebellar cortex following lengthy periods of undernutrition (Warren & Bedi) **170,** 173

Formation of synapses in cerebellar explants by axons from co-cultured media (Bird) **173,** 77

Syncytial plaques, The role of trophoblastic binucleate cells in implantation in the goat: a morphological study (Wango, *et al.*) **171,** 241

Syncytiotrophoblast, Endocytosis of HRP-labelled immunoglobulin-G by the syncytiotrophoblast of the perfused human placenta (Leach, *et al.*) **170,** 248, *dem*

Synophthalmia, Floor of the median orbit in human cyclopia: an anatomical study in three dimensions (McGrath & Sperber) **169,** 125

Tail muscles, Spinal cord location of the motoneurons innervating the tail muscles of the cat (Wada, *et al.*) **173,** 101

Teaching, anatomical, Interactive systems using NTSC composite videographics for teaching embryology, radiology and cross-sectional anatomy (Metcalf & Metcalf) **173,** 233, *P*

Teeth, Ultrastructural visualisation of proteoglycans in early unmineralised dentine of rat tooth germs stained with cuprolinic blue (Tenorio, *et al.*) **169,** 257

Teeth, development, Features of the aperiodic microfibrils associated with mouse dental basement membrane demonstrated by ultrastructural histochemistry (Ishizeki, *et al.*) **173,** 139

The homeobox gene Hox 7.1 is expressed during early murine tooth development *in vivo* and *in vitro* (McKenzie, *et al.*) **173,** 202, *dem*

Lectin staining of the developing murine tooth germ, and morphometric analysis of its development *in vivo* and *in vitro* (Jowett & Ferguson) **173,** 215, *dem*

Teleosts, The cranial cartilages of teleosts and their classification (Benjamin) **169,** 153

Tendons, Fibrocartilage in the attachment zones of the quadriceps tendon and patellar ligament of man (Evans, *et al.*) **171,** 155

Subfibrillar architecture and functional properties of collagen: a comparative study in rat tendons (Raspanti, *et al.*) **172,** 157

Measurements of calcified tissue at the attachment zone of tendons and ligaments in man (Evans, *et al.*) **173,** 241, *dem*

Tendons, repair, Collagen fibril populations in repaired extensor tendons of rabbit hind limb (Wilson & Moore) **170,** 243, *P*

An ultrastructural examination of collagen remodelling following a tendon repair. (Wilson & Moore) **173,** 202, *dem*

Tensor tympani, The innervation of the middle ear muscles of the rat (Van der Berge & Van der Wal) **170,** 99

Testis, fetal, Involution of human fetal Leydig cells. An immunohistochemical, ultrastructural and quantitative study (Codesal, *et al.*) **172,** 103

Testosterone, Involution of human fetal Leydig cells. An immunohistochemical, ultrastructural and quantitative study (Codesal, *et al.*) **172,** 103

Thalamus, The thalamic projection to the sensory neocortex of the porpoise, *Phocoena phocoena* (Revishchin & Garey) **169,** 85

Three-dimensional forms, Comparison of three-dimensional form (Richtsmeir, *et al.*) **170,** 221, *P*

Thymus, Immunoglobulins in Hassall's corpuscles of the human thymus (Henry & Anderson) **168,** 185

Tongue, The effects of hetero-reinnervation within the rat tongue (O'Reilly & O'Reilly) **169,** 71

Fibre composition of the hypoglossal nerve in the rat (O'Reilly & Fitzgerald) **172,** 227

Tongue, filiform papillae, Fine structure of the dorsal epithelium of the mongoose tongue (Iwasaki & Miyata) **172,** 201

Trachea, A morphological study of the tracheal epithelium of the snake *Natrix maura* (Pastor) **172,** 47

Trachea, epithelium, Ultrastructure of human fetal trachea. A morphological study of the luminal and glandular epithelia at the mid-trimester (Montgomery, *et al.*) **173,** 43

Trachea, fetal, Ultrastructure of human fetal trachea. A morphological study of the luminal and glandular epithelia at the mid-trimester (Montgomery, *et al.*) **173,** 43

Transferrin, The effect of macromolecular rat serum fractions on conceptuses cultured in human serum: role of transferrin (Gulamhusein, *et al.*) **168,** 113

Transforming growth factor, Exogenous transforming growth factor α and epidermal growth factor can both stimulate growth of post-implantation rat embryos (Pratten) **173,** 210, *dem*

Transforming growth factor-B1, The effects of TGF-β_1 on mouse embryonic palate mesenchymal cell protein synthesis are modulated by the presence or absence of serum (Sharpe, *et al.*) **173,** 212, *dem*

Transitional zone, High density of nodes of Ranvier in the CNS–PNS transitional zone (Fraher & Bristol) **170,** 131

Tricuspid valve, Development of the septal leaflet of the tricuspid valve in the human heart (Jones) **170,** 241, *P*

Trigeminal ganglion, Simultaneous cell death in the trigeminal ganglion and in ganglion neurons present in the oculomotor nerve of the bovine fetus (Bortolami, *et al.*) **169,** 103

Trochlear nerve, Anatomical note. The superficial

origin of the trochlear nerve with special reference to its vascular relations (Bisaria, *et al.*) **170,** 199

Trophoblast, Behaviour of grafts of rat ectoplacental cone explanted to the chick intraembryonic coelom (Barber) **170,** 239, *P*

Tupaia, The monoptychic glands of the jugulo-sternal scent gland field of *Tupaia*: a TEM and SEM study (Zeller & Richter) **172,** 25

Ultrasound, Femoral anteversion in healthy children. Application of a new method using ultrasound (Upadhyay, *et al.*) **169,** 49

Undernutrition, Prenatal undernutrition permanently decreases enteric neuron number and sympathetic innervation of Auerbach's plexus in the rat (Santer & Conboy) **168,** 57

Synapse-to-neuron ratios in rat cerebellar cortex following lengthy periods of undernutrition (Warren & Bedi) **170,** 173

Effects of undernutrition on neuronal connectivity in the cerebellar cortex of rats (Warren & Bedi) **170,** 225, *P*

Ureter, The three-dimensional structure of the musculature and the nerve elements in the rabbit ureter (Tahara) **170,** 183

Urethra, Serotonin-, somatostatin- and chromogranin A-containing cells of the urethroprostatic complex in sheep. An immunocytochemical and immunofluorescent study (Vittoria, *et al.*) **171,** 169

Uterus, Effect of loss of mechanical distension on collagen degradation in the mouse uterus (Shimizu & Hokano) **173,** 161

Vas deferens, Ultrastructure of the monkey vas deferens (Leong & Singh) **171,** 85

Innervation of the monkey vas deferens (Leong & Singh) **171,** 93

Vasoactive intestinal polypeptide, Changes in vasoactive intestinal polypeptide (VIP) levels in the rabbit oviduct at different hormonal stages. An immunohistochemical study (Menghi, *et al.*) **171,** 139

Vasopressin, Morphometric study on the development of magnocellular neurons of the supraoptic nucleus utilising immunohistochemical methods (Lazcano, *et al.*) **168,** 1

Immunocytochemical localisation of vasopressin in the rat median eminence (Ray, *et al.*) **173,** 204, *dem*

Vasopressin immunoreactivity in heterozygous Brattleboro' rat (Choudhury, *et al.*) **173,** 240, *dem*

Vastus lateralis, Morphological variations of the human vastus lateralis muscle (Willan, *et al.*) **168,** 235

Vastus medialis, Nerve supply of the human vastus medialis muscle (Thiranagama) **170,** 193

Vertebrae, The ossification of the costal element of the seventh cervical vertebra with particular reference to cervical ribs (McNally, *et al.*) **170,** 125

Vertebrae, cervical, Segmental average instantaneous centres of rotation in the cervical spine; an X-ray cinematographic study (van Mameren, *et al.*) **173,** 228, *P*

Vertebral column, Nerve supply to the posterior longitudinal ligament and the intervertebral disc of the rat vertebral column as studied by acetylcholinesterase histochemistry. I. Distribution in the lumbar region (Kojima, *et al.*) **169,** 237

Nerve supply to the posterior longitudinal ligament and the intervertebral disc of the rat vertebral column as studied by acetylcholinesterase histochemistry. II. Regional differences in the distribution of the nerve fibres and their origins (Kojima, *et al.*) **169,** 247

Vertebral column, development, The human vertebral column at the end of the embryonic period proper. 3. The thoracicolumbar region (O'Rahilly, *et al.*) **168,** 81

The human vertebral column at the end of the embryonic period proper. 4. The sacrococcygeal region (O'Rahilly, *et al.*) **168,** 95

Vestibulo-cochlear nerve, Morphology of the rat cochlear primary afferents during prenatal development: a Cajal's reduced silver and rapid Golgi study (Angulo, *et al.*) **168,** 241

Virchow–Robin spaces, Interrelationships of the pia mater and the perivascular (Virchow–Robin) spaces in the human cerebrum (Zhang, *et al.*) **170,** 111

Vomer, development, Radiographic study of the morphological development of the vomer (Verwoerd, *et al.*) **173,** 235, *P*

Walking, The mechanical properties of the human subcalcaneal fat pad in compression (Bennett & Ker) **171,** 131

Wohlfart fibres, An enzyme histochemical study of large muscle fibres in the neonatal mouse (Christie, *et al.*) **170,** 139

Wound healing, The extracellular matrix and soluble growth factors in fetal and adult wound healing (Whitby & Ferguson) **173,** 205, *dem*

Distribution of extracellular matrix molecules during wound healing of embryonic palatal shelves using a novel *in vitro* model system (Rogers & Ferguson) **173,** 206, *dem*

A comparison of wound healing in adult and pouch young *Monodelphis domestica* (Howarth & Ferguson) **173,** 207, *dem*

Specialized embryonic ectoderm does not re-form after wounding (Wilson & McNeill) **173,** 207, *dem*

Wrist joint, Histological studies on the radial and ulnar attachments of the triangular fibrocartilage complex of the wrist (Benjamin, *et al.*) **170,** 257, *dem*

Histological studies on the triangular fibrocartilage complex of the wrist (Benjamin, *et al.*) **172,** 59

Yolk sac, The effect of change in pH of the medium on the uptake, transport and digestion of immunoglobulin-G (IgG) by the rat visceral yolk sac cultured as a closed vesicle (Toomey, *et al.*) **170,** 249, *dem*

Zebra finch, reproduction, Air humidity and water supply affect reproductive activity in the zebra finch (Priedkalns & Bennett) **173,** 207, *dem*

Zona glomerulosa, Stereological and functional investigations on isolated adrenocortical cells. II. Zona glomerulosa cells of chronically ACTH-treated rats (Andreis, *et al.*) **168,** 199
